

TOUGH PARENTING

The debate over different parenting techniques has never stopped. Modern parents are divided between a permissive style and a tiger style, and the latter seems more effective. The burning topic of a Tiger Mother illustrates how a Chinese mom cruelly, yet successfully, raised two prodigies. However, controversies and rumination surfaced soon after the mother proudly introduced her parenting methodology to the public. It is difficult for people to ignore the negative impacts on children when adopting such a ruthless form of education. Children are not given the rights to decide what they want to do after school, which always leads to their poor time management ability. Worse, they are usually motivated by the fear of being punished instead of the desire to learn. Relationships within such families usually deteriorate due to the lack of communication.
